

Fenchurch Faris Ltd.

# Energy

The energy sector faces unprecedented transformations, from rapid technological shifts to complex environmental regulations. While carbon emission targets and renewable transitions reshape the industry, businesses require sophisticated risk management that goes beyond traditional coverage.

Our solutions are designed to empower energy companies to tackle these challenges with confidence and strategic insight.

FENCHURCH  
FARIS

## **Oil & Energy**

This insurance covers all business underwritten in respect of Oil & Gas related business, including:

- Energy Onshore & Offshore
- Energy related Construction (including Liabilities)
- Operators Extra Expense (Control of Well/Re-drilling Expenses/Seepage & Pollution.
- Business Interruption/Loss of Production Income written in conjunction with Physical Damage/ Asset policies

- Platforms and floating production systems
- Sub-sea pipelines
- Sub-sea production systems
- Storage and loading facilities
- Harbors/jetties
- Delay in start-up

- Mobile offshore drilling units
- Builders' risks, including delay in delivery
- Land rigs

- Platforms, pipelines, etc.
- Control of well, re-drilling, seepage and pollution, etc.

- Diving - remotely operated vehicles
- Seismic-streamers, etc.

We also provide cover for third party liability and business interruption risks in respect of all of the above.

### **Onshore Services**

Our Insurance team has developed its expertise by working in close partnership with a wide range of clients in oil and gas, petrochemicals, power and renewable energy. We see it as our job not just to provide you with the most effective and secure protection, but also to find new ways to capitalise on changing market conditions.

We have particular expertise in debt finance, which is commonly used in power, renewable energy and infrastructure projects. We act on behalf of owners, investors and lending banks assisting in structuring optimum insurance coverages.

Our team is experienced in providing cover for a wide range of areas, including:

### **Power And Renewable Energy**

- Power plants (gas, coal, hydro)
- Offshore and onshore wind farms
- Solar projects (PV and CSP)
- Waste-to-Energy and Biomass facilities
- Transmission and distribution
- Gas plants and storage facilities

### **Production, Refining & Marketing**

- Oil refineries
- LNG plants
- Petrochemical plants
- Crude and product pipelines
- Crude and product storage facilities (including stock in storage and transit).
